

AED PROGRAM MANAGEMENT SOLUTIONS

PROVIDING VALUE

First Voice provides TURNKEY value in the AED purchase & implementation process or AED Program Management for distributors and end clients
www.firstvoice.us

Rx: All AEDs come with FREE prescription, no extra charges. (Client must notify us if a hard copy is needed.)

Inspection Tags and Maintenance Tools: All of our products come with AED Inspection tags. They allow for easy verification of maintenance checks & ready to run status of your AEDs. In addition, we supply you with AED Checklists to ensure proper AED policy guidelines for maintenance checks are followed.

AED Training Demos: (in addition to certified training)

As you train new employees or want to educate people within your organization on your AED program, use online demos to help train and assimilate people with the type of AED your facility has.

AED Policy:

What is your AED Policy or Guidelines? Two good resources for policies are available via these resource links and we have many more. Call us for additional resources for your AED Policy and Implementation development.

AED Program Management Software:

For an annual fee, we will manage your AED Program and provide inventory expiration dates on batteries, pads or any other supplies stored with your AED through our online First Voice+AED Program Management Software. It can manage the following: certified AED, CPR, First Aid users & training expiration dates, Medical director information, Expiration dates of pads, batteries, SN tracking, hazardous location information, location of AEDs in facilities (records are broken out by customer and then by location). Call for more information on this product; pricing is the lowest on the market of any AED Program Management Software – GUARANTEED!

Alarmed and Non-alarmed AED Cabinets:

Do you need an alarmed cabinet with the capability to hard wire it to the security system? First Voice alarmed cabinet or basic non-alarmed cabinets are safe and effective ways to store and protect your AED, depending on your needs and where you place the AED cabinet recommendations vary. We also make sure you are putting proper supplies with your AED per state regulated mandates, if any.

Other Tools:

We make sure you consider all of the following when purchasing your AED:

- 1) Signage – flat, horizontal, or V-signs
- 2) Decals for doors/windows
- 3) Extra battery and extra pads for reserve purposes
- 4) Training pads or AED trainer equipment
- 5) Integration of responder supplies to meet responder team needs for any major trauma
- 6) Cabinets that can hold a responder bag, oxygen and AED

Post-event Review:

FREE Post-Event Review software allows for data to be transferred and stored to your medical director and local EMS for event review and training updates to your staff. If you need more sophisticated reporting mechanisms we can assist in that decision process.

Regulatory Updates:

Staying up to date via newsletters and industry information – The Voice is provided by Think Safe as a FREE service for any customer and it covers new AED recommended procedures, updates, recalls, and any other liability protection information for your company or organization and responder team.
