

EID First Aid/CPR Refresher Training System

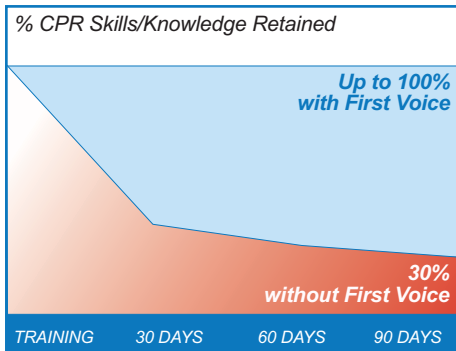

#AVU5601

Are you responsible for emergency training? When was the last time you freshened up your knowledge? Choosing not to will cost...

Think Safe has developed a refresher training system that will reduce your costs and keep your responders at near 100% skills retention all year long.

With state-of-the-art products to ensure that your responders are always up-to-date and ready for action, just 15-30 minutes every month guarantees that your responders know how to respond to any emergency. Major training studies show that 15-30 minute interactive training and online classes can be as effective as 4 hours of training.*

Using our refresher training with the First Voice Emergency Instruction Device (EID) at its core, ensures that you are providing your responders with the best skills retention and equipment at the lowest possible cost.

Normal instructor CPR/First Aid class results.

Rugged Pelican case has a lifetime guarantee!

The Training Scenarios Book

The Training Scenarios Book (#TS001) can be used as needed for a quick anytime training refresher, bringing the instructor to you. Covers medical, injury, and environmental emergencies and ensures skills practice for CPR and a majority of workplace first aid incidences. Comes with quizzes and answer key for your workplace documentation records.

16" x 13" x 6.87" rugged case

* *Increases skill retention*

* *Exceeds OSHA training requirements*

* *Reduces disability costs*

The Emergency Instruction Device

The Emergency Instruction Device (EID) (#AVU5001x) is the heart of the First Voice products. At only 1.25 inches thick, this new EID is backed by a 3-year warranty on all parts and is patent protected. All protocols are compliant with current approved international First Aid and ECC CPR protocols, and this device is updateable. Utilizing yes/no questions quickly gets the trainee through practice training scenarios.

Responder's Handbook

The Responder's Handbook (#V10570) is the book form of the EID buttons. A comprehensive walk-through of hundreds of emergency first aid situations.

Exceed OSHA Training Requirements with this system!
