

## Exhibit A

# AED SITE ASSESSMENT SURVEY

### PROVIDING VALUE

First Voice provides **TURNKEY** value in the AED purchase & implementation process

What does the First Voice™ AED program come with?

Complimentary Rx for all AEDs, AED Training demos, AED Administrator Toolkit (inspection tags, checklists, AED policy hard & soft copy template examples and assistance), Affordable AED Program Management Software with auto-email notification, Online or In-person AED&CPR&First Aid training solutions, AED cabinet or waterproof storage solutions, Signage & Accessories and Medical Direction at the lowest price on the market! And that is not all...with every order we provide a mandate compliance checklist for state AED civil liability laws!

- 1) How many locations do you have and what are the # employed at each location? Provide a listing including city, state location of each facility (to provide information on any medical direction requirements or local mandates) and if possible, the square footage or # of floors per building.
- 2) How many AEDs do you currently have and at which facilities? What makes/models (we'll give you a recall update on the equipment)?
- 3) Do you have any mobile work crews that are doing electrical work?
- 4) How many responders do you currently have trained at each facility? Do you need recommendations?
- 5) What do you currently do for your first aid kits, where are they placed and with who?
- 6) Do you have any special response considerations to note:
  - a. Locked areas (these areas may need their own AED due to access issues and response time)?
  - b. Hazard areas including lock-out Class 1 Div 1 areas?
  - c. Facility security alarm system that cabinets could be hard-wired to?
  - d. Loud noise environments where need strobe light alarmed cabinet?
  - e. Excessive water or dust environments within facilities?
  - f. Do you currently use online training?
  - g. Do you currently have regular responder training meetings?
  - h. Does your insurance company issue credits for AED ownership or "best in class" first aid programs?
  - i. Specific areas / facilities that are very remote and noted to be more than 6 minutes from EMS that are not already provided in the attached listing of facilities?
  - j. Do you have any buildings that have a large % of individuals over 50 years of age?
