

A serious life-threatening injury or emergency can often lead to death when the person does what is intuitive instead of what is necessary. First aid training studies show that within 6-9 weeks after your training course, over 50% of first aid and CPR knowledge is forgotten. First Voice solves these problems. We make first aid and CPR as easy as...

**1** Grab the Emergency Instruction Device, turn it on, and press the appropriate injury button.

**2** Pull the corresponding color-coded supply bag. Everything inside the color-coded bag is pre-packaged to treat that injury.

**3** Listen and follow the instructions. The EID prompts you when to grab other supplies from the kit, including the AED for sudden cardiac arrest, and provides reminders such as calling 9-1-1.

Automated External Defibrillator (AED)      CELOX      Blood clotting agent      AmpuSave amputation kit      Bloodborne pathogen cleanup kit

*“Having the EID available gives peace of mind for those first to provide aid, giving the victim every opportunity for a positive outcome.”*  
*Dr. Donald Linder*  
*Emergency Physician*

## How does the EID benefit those first to provide aid in an emergency situation?

- Mediates any panic with equipment that meets and exceeds OSHA requirements
- Provides accurate first aid care with protocols aligned to ECC and international First Aid Science guidelines
- Increases preparedness to help reduce complications and disability costs from injuries
- Improves outcomes and training retention for infrequently trained rescuers
- Eliminates training difficulties for multilingual facilities (with English and Spanish standard on the device)
- Decreases costs of training and insurance

2010 ECC/AHA Compliant!

### What is the EID Assist used for?

- First aid training that engages the senses and improves retention of skills(great online training accessory)
- Homeland security, bloodborne pathogen, personal protection & scene safety training use & reminders
- First aid or CPR training drill use
- Real-time use during trauma and first aid situations:
  - Construction sites, mobile worksites, dangerous workplaces, or any place of employment
  - Schools, high-rise buildings, or any childcare or caregiver environment
  - Remote or high traffic areas where 911 assistance arrival may be delayed
  - Public and large gathering areas with limited EMT or first responder coverage

First Voice Emergency Instruction Device (AVU5001x)

Endorsed by the American Lifeguard Association

Approved by major training organizations.
