

Considering the purchase of a defibrillator(AED)?

#hs01

Rugged AED that stretches your budget dollars

- **Durable - highest durability rating of any AED; designed to be used for mobile deployments and rugged indoor or outdoor environment**
- **Cost of ownership - most inexpensive AED to buy but also the lowest upkeep costs: Pad-Pak expiry provides 2 years more life than competitor pads**
- **Compact - smallest and lightest AED on the market at 2.4 pounds; easy to transport and small size reduces cost for cabinet storage**
- **Ease of use - easiest to maintain AED with only 1 expiry date to monitor for Pad-Pak that combines pads and battery; visual and audible prompts including CPR metronome**
- **Advanced technology - utilizes advanced SCOPE technology to assess rhythm and recommend defibrillation if necessary; survival rates using HeartSine technology are higher than competitors**
- **10 year warranty - beats AED competitors with at least a 2 to 5 year additional warranty at NO Extra Cost**
